Total-Flooding Nozzle

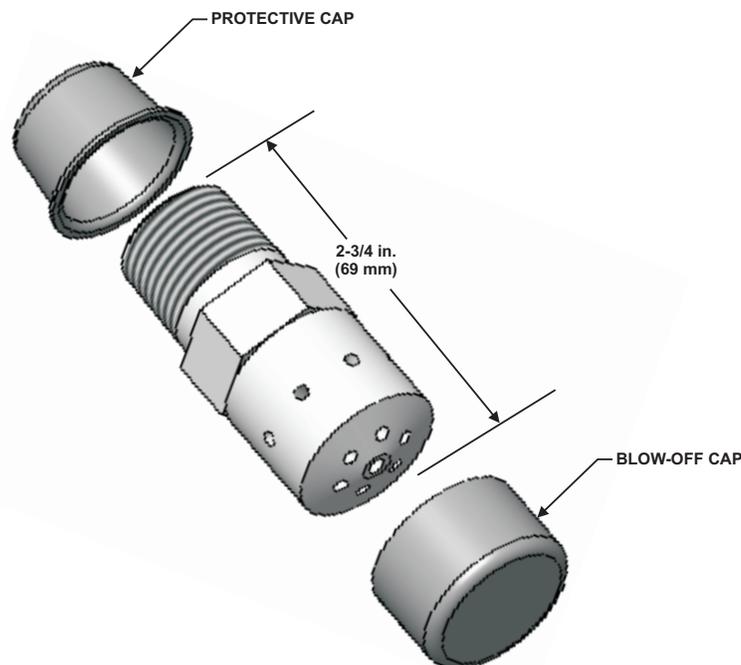

Effective: March 2011
K-83-012

P/N: 83-10005-001

DESCRIPTION

The Total-Flooding (TF) Nozzle is designed to uniformly discharge Kidde® dry chemical suppression agent throughout an enclosed volume. This nozzle is to be mounted at ceiling level (unless otherwise listed) with the orifice tip pointed vertically down. The TF Nozzle is also used to protect the work area volume for open face spray booth applications and for vehicle spray booth applications.

Each TF Nozzle is factory-equipped with a blow-off cap to protect the nozzle orifices and to prevent moisture buildup in the discharge piping.
